CHRISTIAN SCIENCE CHURCHES

"In the Universe, including Man, Evolved by Atomic Forces" was the subject of the Lesson-Sermon Sunday, June 17th, in all Churches of Christ, Scientist, branches of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass.

The stations which comprised the Lesson-Sermon included the following from the Bible: "For our light affliction, which is but for a moment, worketh for us a far more exceeding and eternal weight of glory; While we look not at the things which are seen, but at the things which are not seen: for the things which are seen are temporal; but the things which are not seen are eternal." (II Corinthians 4:17, 18.)

The Lesson-Sermon also included the following passage from the Bible: "The Science of Health with Key to the Scriptures," by Mary Baker Eddy; "Knowing the Science of creation, in which all is Mind and its ideas, Jesus rebuked the material thought of his fellow-countrymen: 'Ye can discern the face of the sky; but can ye not discern the signs of the times?' How much more should we seek to apprehend the spiritual ideas of God, than to dwell on the objects of sense!" (p. 609).

Nineteen Summer Health Schools

Open July 2 L. A. County Board Of Health Offers To Help Week

Nineteen Summer Health Schools are to open their sessions July 2 in Los Angeles County, it is announced by the Los Angeles County Health Department and the Tuberculosis Committee of the Los Angeles County Public Health Association, under whose joint auspices the Summer Health Schools are being conducted for the fourth year. These schools are partially financed through the sale of Christmas Seals.

The success of the Summer Health School plan to build up the resistance of physically below par children is attested to in the urgent demand for more schools this year and the enthusiastic cooperation of the local school organizations. Parent-Teacher associations, civic organizations and other local clubs. Last year there were twelve Summer Health Schools, with an enrollment of approximately 400 children.

An innovation for this year will be a second school at Glendale, which will open June 18 and run for a six weeks' session for children who are taking the required Summer session work, so that they may receive in addition the Summer Health School training with proper diet and regular rest periods. "The three past years have given convincing proof that the basic principles of the Summer Health Schools are correct," states Dr. Elizabeth Shapiro, director of the Summer Health Schools. "The Summer Health School does not create a break in the home life, as is the case in the Summer Camp program. Due to the opportunities the mother has to consult with the staff about the problem of her own child, the health standard of the entire family was benefited. A survey taken many months later showed this."
